

February 24, 2017

President Donald J. Trump  
The White House  
United States of America

Dear President Trump,

Since the founding of this country, science has been fundamental to the advancement of sound policy and economic prosperity and innovation. Science improves the lives of Americans, stimulates our economy, advances our understanding of our world, and protects us and our families from harm. As you select advisors that will help you to draft a blueprint for American policy, we urge you to make appointing a Science Advisor an immediate priority.

Science is in the DNA of the United States. It plays an integral part in our nation's security, economic growth, public health, and infrastructure. Appointing a Science Advisor quickly will enable the Administration to maximize investments in science and develop a strategic plan that secures America's leadership in science. The Science Advisor will assist your administration in driving innovation, and provide scientifically sound solutions to the pressing issues facing our nation today; including updating deteriorating infrastructure, combatting health epidemics, providing clean air and water, and securing valuable natural resources and minerals. Appointing a Science Advisor is a smart investment for our nation and for keeping our position as a scientific leader globally.

Due to the integral role of the Science Advisor, we urge you to appoint an individual with a strong scientific background who understands the rigorous scientific method, the need for evidence-based science, and who can leverage the collaborative nature of the scientific community and the value of scientific research in shaping America's future.

As supporters of science, we urge you to work with our scientific organizations as you commence the selection process and the important task of advancing America's scientific enterprise.

Sincerely,

Di Tian, Auburn, Ala.
